

Make Remote Desktop Connection to Olympus

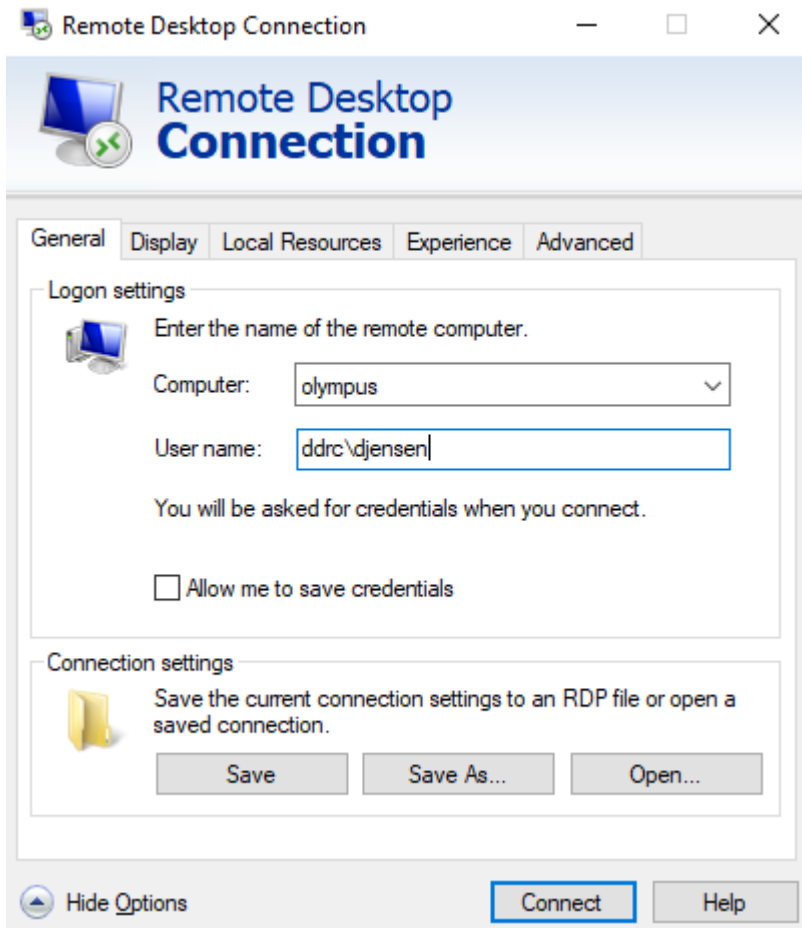

-Make sure you are connect to DDRC through VPN or Direct Access

-in the search bar start typing remote and select Remote Desktop Connection

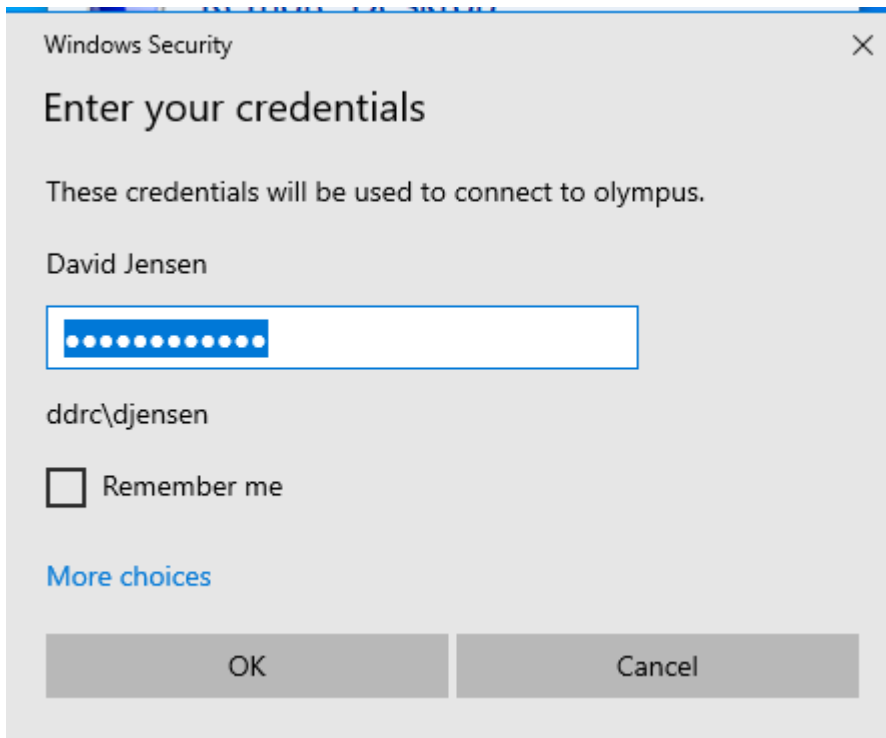

-the following window pops-up and type in Olympus (or 10.10.15.76) in the computer field

-click on the down arrow in front of Show Options

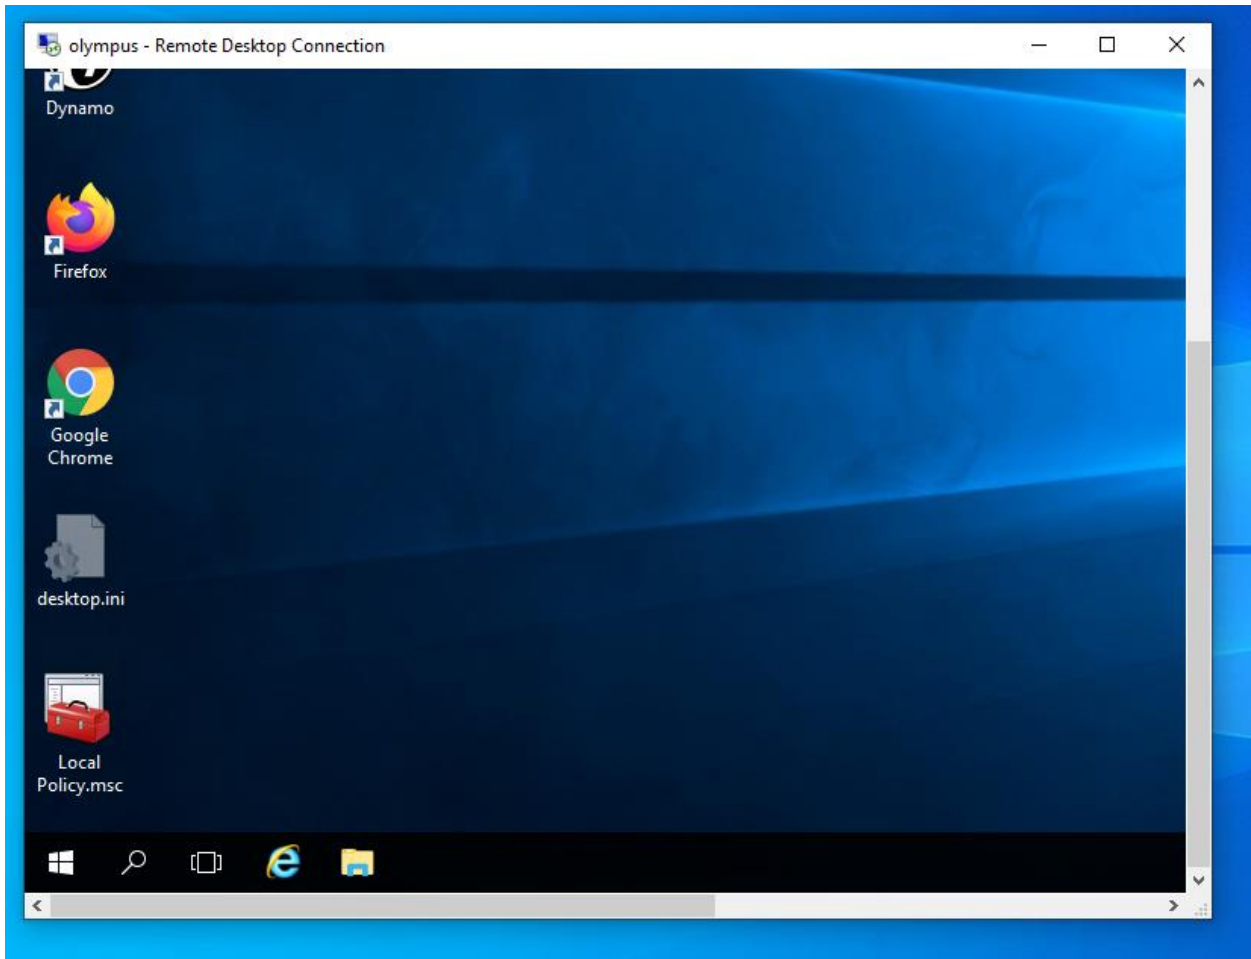

-type in your user name as shown

-type in your password

If you see this message click yes because you know it is a DDRC server.

-this gives you a desktop on the server. From there you can access your files with offi and run Dynamo
